

# Contents

<b>Introduction</b>	<b>13</b>
Feedback.....	13
Downloading the sample files.....	13
Problem resolution .....	13
Typographical Conventions Used In This Book.....	14
<b>Putting the Smart Method to Work</b>	<b>16</b>
Visual Studio version and service pack .....	16
Sessions and lessons .....	16
Read the book from beginning to end.....	16
How this book avoids wasting your time .....	17
Why our classroom courses work so well .....	17
How this book mimics our classroom technique .....	17
Avoiding repetition .....	18
Use of American English .....	18
First page of a session.....	19
Every lesson is presented on two facing pages.....	20
Learning by participation .....	21
<b>Session One: Getting Started with Visual Studio</b>	<b>23</b>
Session Objectives .....	23
Lesson 1-1: Install Visual Studio.....	24
Lesson 1-2: Check your Visual Studio and Windows version.....	26
Lesson 1-3: Set up the development environment and download the sample files .....	28
Lesson 1-4: Set up Windows for development .....	30
Lesson 1-5: Create an ASP.NET Web Application project .....	32
Lesson 1-6: Create an ASP.NET Web Site project .....	34
Lesson 1-7: Manage a project with the Solution Explorer .....	36
Lesson 1-8: Run a project in debug mode .....	38
Lesson 1-9: View .aspx pages in Source and Design views .....	40
Lesson 1-10: Use automatic formatting .....	42
Lesson 1-11: Expand and collapse code regions.....	44
Lesson 1-12: Change properties in Design view .....	46
Lesson 1-13: Change properties in Source view .....	48
Lesson 1-14: Add controls to a page with the Toolbox.....	50
Lesson 1-15: Use the QuickTasks menu .....	52
Lesson 1-16: Get help .....	54
Session 1: Exercise.....	57
Session 1: Exercise Answers .....	59

**Session Two: Understanding Web Sites 61**

Session Objectives .....	61
Lesson 2-1: Understand HTML bold, italic and heading tags .....	62
Lesson 2-2: Understand HTML paragraph and break tags.....	64
Lesson 2-3: Understand the aspx page structure.....	66
Lesson 2-4: Use the title, meta, link and script tags .....	68
Lesson 2-5: Create an HTML table .....	70
Lesson 2-6: Navigate HTML with the tag navigator.....	72
Lesson 2-7: Display images and links on a page .....	74
Lesson 2-8: Work with CSS.....	76
Lesson 2-9: Use the CSS Properties window.....	78
Lesson 2-10: Use the div and span tags .....	80
Lesson 2-11: Work with JavaScript.....	82
Lesson 2-12: Work with HTML Forms.....	84
Session 2: Exercise .....	87
Session 2: Exercise Answers .....	89

**Session Three: ASP.NET Web Pages 91**

Session Objectives .....	91
Lesson 3-1: Change properties with C# .....	92
Lesson 3-2: Add event handlers to Controls .....	94
Lesson 3-3: Use Breakpoints.....	96
Lesson 3-4: Use Watches and Locals .....	98
Lesson 3-5: Understand the Exception object .....	100
Lesson 3-6: Understand the Page object .....	102
Lesson 3-7: Understand Request and Response .....	104
Lesson 3-8: UnderstandPostBack.....	106
Lesson 3-9: Work with ViewState.....	108
Lesson 3-10: Move between pages using C# .....	110
Lesson 3-11: Send data between pages .....	112
Lesson 3-12: Use Session.....	114
Lesson 3-13: Edit the Web.config file .....	116
Session 3: Exercise .....	119
Session 3: Exercise Answers .....	121

**Session Four: ASP.NET Controls 123**

Session Objectives .....	123
Lesson 4-1: Name controls correctly .....	124
Lesson 4-2: Use button controls .....	126
Lesson 4-3: Use label and literal controls.....	128
Lesson 4-4: Use text boxes .....	130

---

Lesson 4-5: Use check boxes .....	132
Lesson 4-6: Use radio buttons .....	134
Lesson 4-7: Use drop down lists .....	136
Lesson 4-8: Use the RequiredFieldValidator control .....	138
Lesson 4-9: Use other validation controls .....	140
Lesson 4-10: Use common properties .....	142
Session 4: Exercise .....	145
Session 4: Exercise Answers .....	147
<b>Session Five: C# Variables</b> .....	<b>149</b>
Session Objectives .....	149
Lesson 5-1: Use IntelliSense .....	150
Lesson 5-2: Create a variable .....	152
Lesson 5-3: Use string variable properties and methods .....	154
Lesson 5-4: Use integer variables .....	156
Lesson 5-5: Use floating point variables .....	158
Lesson 5-6: Use Boolean variables .....	160
Lesson 5-7: Use DateTime variables .....	162
Lesson 5-8: Convert variables using Convert and Parse .....	164
Lesson 5-9: Convert variables using cast and ToString .....	166
Lesson 5-10: Perform basic mathematical operations .....	168
Lesson 5-11: Use the Math library for advanced mathematics .....	170
Lesson 5-12: Understand null .....	172
Lesson 5-13: Use object and var variables .....	174
Session 5: Exercise .....	177
Session 5: Exercise Answers .....	179
<b>Session Six: C# Classes, Namespaces and Methods</b> .....	<b>181</b>
Session Objectives .....	181
Lesson 6-1: Create a class .....	182
Lesson 6-2: Create an instance of a class .....	184
Lesson 6-3: Use the .NET library .....	186
Lesson 6-4: Work with namespaces .....	188
Lesson 6-5: Create and use methods .....	190
Lesson 6-6: Create methods with arguments .....	192
Lesson 6-7: Create methods that return a value .....	194
Lesson 6-8: Create a private method .....	196
Lesson 6-9: Create a static method .....	198
Lesson 6-10: Create and dispose of instances .....	200
Lesson 6-11: Create class constructors .....	202
Session 6: Exercise .....	205

Session 6: Exercise Answers .....	207
<b>Session Seven: C# Logical constructs and error handling</b>	<b>209</b>
Session Objectives .....	209
Lesson 7-1: Use the if statement.....	210
Lesson 7-2: Use else and else if .....	212
Lesson 7-3: Use basic logical operators.....	214
Lesson 7-4: Use advanced logic .....	216
Lesson 7-5: Use get and set.....	218
Lesson 7-6: Use try and catch to handle errors .....	220
Lesson 7-7: Use comments.....	222
Lesson 7-8: Use summaries.....	224
Session 7: Exercise .....	227
Session 7: Exercise Answers .....	229
<b>Session Eight: C# Collections and Loops</b>	<b>231</b>
Session Objectives .....	231
Lesson 8-1: Create an array.....	232
Lesson 8-2: Create a collection .....	234
Lesson 8-3: Iterate through a collection using foreach.....	236
Lesson 8-4: Iterate through a collection using a for loop.....	238
Lesson 8-5: Use break and return .....	240
Session 8: Exercise .....	243
Session 8: Exercise Answers .....	245
<b>Session Nine: Authentication</b>	<b>247</b>
Session Objectives .....	247
Lesson 9-1: Use .NET's built-in security features .....	248
Lesson 9-2: Manage a site with ASP.NET Configuration.....	250
Lesson 9-3: Change authentication types .....	252
Lesson 9-4: Use the Login control.....	254
Lesson 9-5: Customize the Login control.....	256
Lesson 9-6: Use the CreateUserWizard control .....	258
Lesson 9-7: Use other login controls.....	260
Lesson 9-8: Add folder-level security .....	262
Lesson 9-9: Set up roles .....	264
Lesson 9-10: Use C# to limit access.....	266
Lesson 9-11: Use the security wizard .....	268
Session 9: Exercise .....	271
Session 9: Exercise Answers .....	273
<b>Session Ten: Accessing Data</b>	<b>275</b>

Session Objectives .....	275
Lesson 10-1: Work with SQL databases in Visual Studio .....	276
Lesson 10-2: Add LINQ data classes to a project .....	278
Lesson 10-3: Retrieve a single row of data using LINQ .....	280
Lesson 10-4: Retrieve multiple rows of data using LINQ .....	282
Lesson 10-5: Sort results and call stored procedures using LINQ .....	284
Lesson 10-6: Check whether a record exists using LINQ.....	286
Lesson 10-7: Update database records using LINQ.....	288
Lesson 10-8: Insert database records using LINQ.....	290
Lesson 10-9: Delete database records using LINQ.....	292
Lesson 10-10: Use LINQ with collections .....	294
Session 10: Exercise .....	297
Session 10: Exercise Answers .....	299

## **Session Eleven: Using data controls 301**

Session Objectives .....	301
Lesson 11-1: Use the LinqDataSource control .....	302
Lesson 11-2: Attach a data source to a control.....	304
Lesson 11-3: Use the GridView control .....	306
Lesson 11-4: Add sorting and paging to a GridView .....	308
Lesson 11-5: Add editing features to a GridView .....	310
Lesson 11-6: Use the DetailsView control .....	312
Lesson 11-7: Use the <i>SqlDataSource</i> control.....	314
Lesson 11-8: Bind data to a control using C# .....	316
Session 11: Exercise .....	319
Session 11: Exercise Answers .....	321

## **Session Twelve: Build a complete ASP.NET site 323**

Session Objectives .....	323
Lesson 12-1: Use a master page .....	324
Lesson 12-2: Handle errors with Global.asax .....	326
Lesson 12-3: Log errors to a database .....	328
Lesson 12-4: Create a Products page.....	330
Lesson 12-5: Create a Shopping Cart .....	332
Lesson 12-6: Create a Search page .....	334
Lesson 12-7: Add functionality to a Search page .....	336
Lesson 12-8: Create a Checkout page.....	338
Lesson 12-9: Create a Payment page.....	340
Lesson 12-10: Implement security .....	342
Lesson 12-11: Publish a site .....	344
Session 12: Exercise .....	347

Session 12: Exercise Answers .....349
