

# Contents

<b>Introduction</b>	<b>13</b>
Feedback.....	13
Downloading the sample files.....	13
Problem resolution .....	13
Typographical Conventions Used In This Book.....	14
<b>Putting the Smart Method to Work</b>	<b>16</b>
Visual Studio version and service pack .....	16
Sessions and lessons .....	16
Read the book from beginning to end.....	16
How this book avoids wasting your time .....	17
Why our classroom courses work so well .....	17
How this book mimics our classroom technique .....	17
Avoiding repetition .....	18
Use of American English .....	18
First page of a session.....	19
Every lesson is presented on two facing pages.....	20
Learning by participation .....	21
<b>Session One: Advanced Visual Studio features</b>	<b>23</b>
Session Objectives .....	23
Lesson 1-1: Convert a Web Site project into a Web Application project.....	24
Lesson 1-2: Add references to a project .....	26
Lesson 1-3: Use the Debug and Release profiles .....	28
Lesson 1-4: Build, Rebuild and Clean a project .....	30
Lesson 1-5: Change Build options .....	32
Lesson 1-6: Change Web options.....	34
Lesson 1-7: Change the version of ASP.NET used by the project.....	36
Lesson 1-8: Create an XML documentation file.....	38
Lesson 1-9: Use the Error List window.....	40
Lesson 1-10: Understand the Output window .....	42
Lesson 1-11: Use the Immediate window.....	44
Lesson 1-12: Use Code Snippets .....	46
Lesson 1-13: Use Surround With.....	48
Lesson 1-14: Use the Extract Method refactoring utility .....	50
Lesson 1-15: Use the Rename refactoring utility .....	52
Session 1: Exercise.....	55
Session 1: Exercise Answers .....	57
<b>Session Two: Advanced .NET classes</b>	<b>59</b>

Session Objectives .....	59
Lesson 2-1: Use the Tuple class .....	60
Lesson 2-2: Use the Lazy class .....	62
Lesson 2-3: Use the Stream class .....	64
Lesson 2-4: Use the Byte class .....	66
Lesson 2-5: Use the TimeSpan class .....	68
Lesson 2-6: Create a multidimensional array .....	70
Lesson 2-7: Iterate through a multidimensional array .....	72
Lesson 2-8: Send commands to the Garbage Collector .....	74
Lesson 2-9: Send e-mail messages using the SmtpClient class .....	76
Session 2: Exercise .....	79
Session 2: Exercise Answers .....	81
<b>Session Three: Threading and Cryptography</b> .....	<b>83</b>
Session Objectives .....	83
Lesson 3-1: Understand cryptography and prepare data for encryption .....	84
Lesson 3-2: Encrypt data using the AES standard .....	86
Lesson 3-3: Decrypt data using the AES standard .....	88
Lesson 3-4: Implement multi-threading using the Thread class .....	90
Lesson 3-5: Prevent race conditions when working with threads .....	92
Lesson 3-6: Use the ThreadPool class to manage multiple threads .....	94
Lesson 3-7: Use the lock statement to prevent threads from conflicting .....	96
Lesson 3-8: Display a loading indicator using JavaScript .....	98
Session 3: Exercise .....	101
Session 3: Exercise Answers .....	103
<b>Session Four: Advanced class structures</b> .....	<b>105</b>
Session Objectives .....	105
Lesson 4-1: Use the ref keyword .....	106
Lesson 4-2: Create a struct .....	108
Lesson 4-3: Create an enum .....	110
Lesson 4-4: Create a class library .....	112
Lesson 4-5: Add a class library to a project .....	114
Lesson 4-6: Overload a method .....	116
Lesson 4-7: Add optional arguments to a method .....	118
Lesson 4-8: Use the out keyword to get multiple values from a method .....	120
Lesson 4-9: Output multiple values from a single method .....	122
Lesson 4-10: Extend a class .....	124
Lesson 4-11: Add an extended control to a page .....	126
Lesson 4-12: Understand polymorphism .....	128
Lesson 4-13: Understand the virtual and override keywords .....	130

Lesson 4-14: Understand the abstract keyword .....	132
Lesson 4-15: Implement an interface.....	134
Lesson 4-16: Create an interface .....	136
Lesson 4-17: Use the Class View window .....	138
Lesson 4-18: Use the Object Browser window.....	140
Lesson 4-19: Understand delegate methods .....	142
Session 4: Exercise.....	145
Session 4: Exercise Answers .....	147

## **Session Five: Compiler directives and advanced debugging 149**

Session Objectives .....	149
Lesson 5-1: Create code regions with the #region directive .....	150
Lesson 5-2: Use the #if directive to selectively compile code .....	152
Lesson 5-3: Use the #if directive with the TRACE constant.....	154
Lesson 5-4: Use the #define directive to create a new constant.....	156
Lesson 5-5: Use the #else and #elif directives .....	158
Lesson 5-6: Use the #warning directive to show warnings when compiling.....	160
Lesson 5-7: Use the #error directive to cause a compile error .....	162
Lesson 5-8: Use System.Diagnostics to write Debug messages.....	164
Lesson 5-9: Use a listener to save diagnostic information to a file .....	166
Lesson 5-10: Enable tracing .....	168
Session 5: Exercise.....	171
Session 5: Exercise Answers .....	173

## **Session Six: Advanced ASP.NET controls 175**

Session Objectives .....	175
Lesson 6-1: Use the Panel and Placeholder controls.....	176
Lesson 6-2: Use the Calendar control.....	178
Lesson 6-3: Use the FileUpload control .....	180
Lesson 6-4: Create a Chart control.....	182
Lesson 6-5: Customize the Chart control.....	184
Lesson 6-6: Use the View and MultiView controls .....	186
Lesson 6-7: Understand primary and foreign keys.....	188
Lesson 6-8: Use the GridView TemplateField .....	190
Lesson 6-9: Use the GridView EditItemTemplate .....	192
Lesson 6-10: Create a ListView control.....	194
Lesson 6-11: Add editing features to a ListView control .....	196
Lesson 6-12: Add resources files to a project .....	198
Lesson 6-13: Use the Localize control .....	200
Lesson 6-14: Add a sitemap file to a project.....	202
Lesson 6-15: Use the SiteMapPath control .....	204

Lesson 6-16: Use the TreeView and SiteMapDataSource controls.....	206
Lesson 6-17: Use the Menu control.....	208
Session 6: Exercise.....	211
Session 6: Exercise Answers.....	213
<b>Session Seven: Advanced ASP.NET techniques</b>	<b>215</b>
Session Objectives.....	215
Lesson 7-1: Work with application settings.....	216
Lesson 7-2: Create a skin.....	218
Lesson 7-3: Work with multiple themes.....	220
Lesson 7-4: Create a Web User Control.....	222
Lesson 7-5: Create an HTTP Handler.....	224
Lesson 7-6: Apply an HTTP Handler to a folder.....	226
Lesson 7-7: Create an HTTP Module.....	228
Lesson 7-8: Implement custom security with an HTTP Module.....	230
Lesson 7-9: Enable caching.....	232
Lesson 7-10: Use the Substitution control to enable partial caching.....	234
Session 7: Exercise.....	237
Session 7: Exercise Answers.....	239
<b>Session Eight: Web services and AJAX</b>	<b>241</b>
Session Objectives.....	241
Lesson 8-1: Create a web service.....	242
Lesson 8-2: Use a Service Reference to connect to a web service.....	244
Lesson 8-3: Create ScriptManager and UpdatePanel controls.....	246
Lesson 8-4: Add triggers to an UpdatePanel control.....	248
Lesson 8-5: Use the Timer control for scheduled updates.....	250
Lesson 8-6: Create a web method.....	252
Lesson 8-7: Call a web method using JavaScript.....	254
Lesson 8-8: Call a web method that returns a value using JavaScript.....	256
Lesson 8-9: Understand JQuery.....	258
Lesson 8-10: Directly call a web method using JQuery and JSON.....	260
Lesson 8-11: Directly call a web method that returns a value using JQuery.....	262
Session 8: Exercise.....	265
Session 8: Exercise Answers.....	267
<b>Session Nine: Advanced data access techniques</b>	<b>269</b>
Session Objectives.....	269
Lesson 9-1: Use the Average LINQ method.....	270
Lesson 9-2: Use LINQ anonymous types.....	272
Lesson 9-3: Use the Sum and GroupBy LINQ methods.....	274
Lesson 9-4: Send SQL code through LINQ.....	276

Lesson 9-5: Connect to a database using the SqlConnection namespace .....	278
Lesson 9-6: Run a SQL query using the SqlConnection namespace .....	280
Lesson 9-7: Write data to a CSV file .....	282
Lesson 9-8: Read data from a CSV file .....	284
Lesson 9-9: Write data to an XML file .....	286
Lesson 9-10: Read data from an XML file .....	288
Lesson 9-11: Understand SQL injection attacks .....	290
Session 9: Exercise .....	293
Session 9: Exercise Answers .....	295

## **Session Ten: Regular Expressions 297**

Session Objectives .....	297
Lesson 10-1: Understand regular expressions .....	298
Lesson 10-2: Create a regular expression to extract words from text .....	300
Lesson 10-3: Create a regular expression for telephone numbers .....	302
Lesson 10-4: Create a regular expression for e-mail addresses .....	304
Lesson 10-5: Create a regular expression for HTML links .....	306
Lesson 10-6: Use the RegularExpressionValidator control .....	308
Lesson 10-7: Work with regular expressions in C# .....	310
Lesson 10-8: Understand cross-site scripting attacks .....	312
Session 10: Exercise .....	315
Session 10: Exercise Answers .....	317

## **Session Eleven: Expert techniques 319**

Session Objectives .....	319
Lesson 11-1: Store a file in a database .....	320
Lesson 11-2: Output a file to the user's web browser .....	322
Lesson 11-3: Run an external program .....	324
Lesson 11-4: Create a scheduled event using a Timer object .....	326
Lesson 11-5: Serialize an object to an XML file .....	328
Lesson 11-6: Deserialize an XML file back into an object .....	330
Lesson 11-7: Compress a file .....	332
Lesson 11-8: Decompress a file .....	334
Lesson 11-9: Use the System.Drawing classes to manipulate images .....	336
Lesson 11-10: Create a Captcha image system .....	338
Lesson 11-11: Create a page that can upload multiple files .....	340
Lesson 11-12: Extract multiple files from a request .....	342
Session 11: Exercise .....	345
Session 11: Exercise Answers .....	347

## **Appendix A: Skills Covered in the Essential Skills Course 349**

Essential skills course outline .....	350
---------------------------------------	-----

Session 1 .....	350
Session 2 .....	350
Session 3 .....	350
Session 4 .....	351
Session 5 .....	351
Session 6 .....	352
Session 7 .....	352
Session 8 .....	352
Session 9 .....	352
Session 10 .....	353
Session 11 .....	353
Session 12 .....	353
